

Summit™ Structures

a level of confidence based on building quality, experienced team members, and speed of construction.

As the true benchmark within the fabric building industry, Summit's expansive headquarters enclose 12,080 square

Summit™ Structures is the leading manufacturer and supplier of clear span steel framed, fabric membrane buildings. With installations at sites worldwide ranging in width from 6m to 90m, Summit™ has quickly established a precedent and reputation for high quality, reliable products and services. Summit™ Structures incorporates the design, supply, construction and installation of tensioned fabric buildings and provides customers with

meters of manufacturing space - home to the most innovative techniques and machinery available. Backed by a comprehensive warranty, Summit's triple-galvanized steel frame and premium quality fabric membranes provide maximum strength and ensure long-term service.

Summit™ has recently contracted buildings for Southampton FC, Manchester City FC, Cirencester Town FC, Reeds School, Heles School, Henbury High School, Millwall Community Scheme, as well as a third of the FA Premier Academy training facilities in the UK.

The level of service Summit™ Structures provides ranges from the supply and installation of fabric buildings to a full turnkey design-build solution. Allow the Summit™ Structures' team to assemble around your building vision and provide you with the Ultimate Building Solution.

Contact Summit™ and put the strength of their in-house design and manufacturing departments to work on your application:
